

Steel Structure / Pressure Vessel

1. Supply Scope & Service of Steel Structure

— Supply Scope

- ∅ Steel structure fabricating according to customers' specification and drawings
- ∅ Service: Detail Design according to Basic Design of customers
- ∅ Ability to translate the ISO/DIN into Chinese Standards GB
- ∅ Qualified welding team
- ∅ Steel structure assembly

2. Supply Scope of Steel Structure

2.1 Steel Frames for Machine

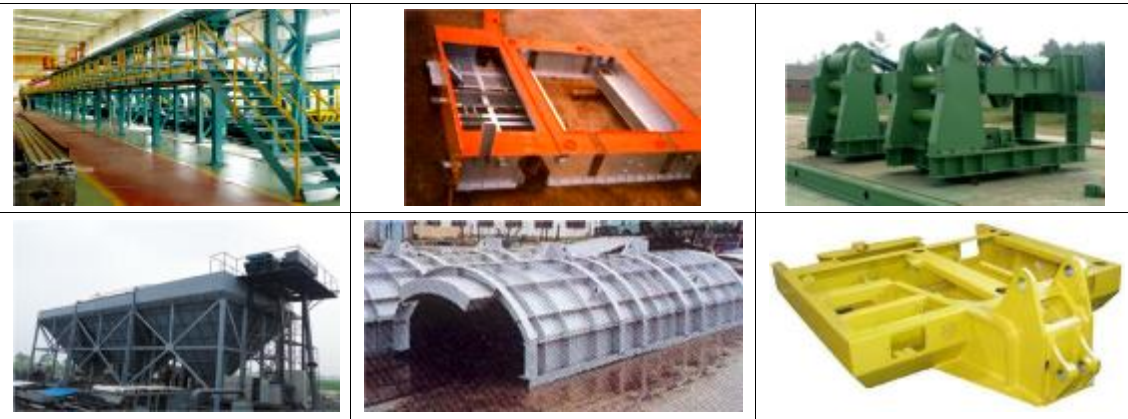

Mining Machine

Cooling Bed for Steel Products

2.2 Machine Parts & Structure Parts

3. Vessel & Tank

Ø We fabricate also according to dwgs, or specification of customers the vessel and silos from metal and plastics, and special tanks, for instance:

- n Graphite heat exchanger
- n Silo made from CS, SS, Alu., Plastic
- n Pressure vessel
- n PPH-Tank, PVDF-Tank

Ø The manufacture of vessel with high pressure has to comply with international or national regulations on pressure vessel

4. Vessel & Pressure Vessel

		
Large-scale pressure vessel	Pressure vessel	Silo
		
Graphite heat exchange	Gas tank	Silo equipment

5. Quality Guarantee

1. Manufacture and inspection according to ISO/DIN, GB (China) or standards and specification provided by customers
2. Search for suitable local suppliers in China and investigate their manufacture ability, equipment and quality system
3. Supervision and inspection of each production step such as raw material procurement, welding, machining and test etc.
4. Inspection und acceptance entrusted to the third party (Inspection institution) available
